

**COMP-3670 Assignment 3**  
**Responsibilities**  
**Ivan Beric**  
**104 831 658**

My responsibilities were to manage the GitHub repository, and to complete the One To One job #1, that is, to detect whether a given host is online on a given IP. Additionally, I took an active role in assisting the group with completion of other parts of Part 2 in the assignment. Difficulties we encountered were group synchronization and the merging of code once we had each completed our part.
